

Add-What's-Missing Book

Bare Foot Walker's Shoes show shoes and boots to use for special activities, like hiking boots for hiking and flippers for swimming.

Cut the pages apart on the dotted lines; cut out the pictures and store them in a zipper baggie. When the children read the book the second time they place the pictures beside the words that describe the type of shoe or boot they are holding. They will draw the shoes and then, draw or trace their foot on the last two blank pages of the book.

Children learn about similarities and differences when they examine the shoes and boots that go on their feet.
