

Melvin the Mango Shape Pop-Up Book

Cut out the mango shape. Use it as a template to make the mango-shaped book cover shown below. (See template.)

Lay it over a folded sheet of orange construction paper. Place the mango template next to the folded edge and cut around the mango to make a book-cover-like silhouette of a mango (do not cut apart the opposed silhouettes.)

Fan-fold the Melvin picture-sequence on the next page.

Glue the first picture, "Melvin and the Mango" to the inside front cover of the mango book cover, as shown below; glue the last picture, "Melvin sitting under the tree," to the inside of the back of the cover.

Do not glue the two center pictures the cover.

The Melvin pictures will pop-up when the children open the book.

Children learn about Melvin hunting for a mango.
